

Energy Policy Statement

Belfast Harbour is committed to reduce the greenhouse gas emissions that result from our energy use whilst ensuring that we continue to meet essential business requirements and the needs of our stakeholders. This policy provides a framework to set and review energy objectives and targets that will achieve this organizational goal.

It is therefore the policy of Belfast Harbour to:

- Comply with all applicable legislation and other requirements to which we subscribe related to energy use, consumption and efficiency
- Incorporate energy efficiency considerations into procurement activities and to design for energy performance improvement
- Establish and maintain a formal Energy Management System that is appropriate to the nature, scale and performance improvement objectives of Belfast Harbour
- Develop awareness and encourage involvement in energy efficiency initiatives by employees, energy customers and other relevant stakeholders
- Ensure the availability of information and resources to set and achieve appropriate objectives and targets
- Demonstrate our commitment through external certification of our Environmental Management and Energy Management Systems to internationally recognised standards
- Strive to continuously improve performance in energy use, consumption and energy management systems
- Communicate this policy to all levels within Belfast Harbour and make it available to other stakeholders as required
- Strive to achieve continual improvement in our energy management systems and performance.

This policy statement is periodically reviewed by Senior Management to ensure that it remains relevant and appropriate to the scope of activities conducted by Belfast Harbour.

Roy Adair CBE
Chief Executive
