

Notice in Respect of Port Charges

Crane Hire – Energy Surcharge

With effect 1 Apr 2026 the **Energy Surcharge** applied to all cranage charges (including the Diesel Component, Electricity Component and HVO Surcharge) is suspended for the forthcoming quarter.

Due to the Gulf conflict and the resulting instability in global energy markets, energy and fuel prices have been significantly elevated over the last few weeks. If this persists, it is anticipated that the Energy Surcharge will be reinstated from July 2026, subject to the outcome of the next quarterly review according to the average cost of Diesel/HVO and electricity consumed in the prior three months.

Further notice will be issued in due course.
