

Notice in Respect of Port Charges

Crane Hire – Energy Surcharge

With effect from 1 July 2026, the Energy Surcharge (including both fuel and energy) applied to all crane charges will be reinstated.

Energy Surcharge	£10.55 per hour of hire
-------------------------	--------------------------------

This follows the continued impact of the Gulf conflict and the resulting instability in global energy markets, which has led to sustained increases in fuel and electricity costs over recent months. As these elevated costs have persisted beyond the previous review period, it has become necessary to reintroduce the surcharge to ensure cost recovery.

The Energy Surcharge will continue to be reviewed on a quarterly basis, aligned with the average cost of fuel and electricity consumed in the preceding three months.
