Operational Notice

No.25 of 2026 – McCaughey Road Civil Works

McQuillan's are planning to commence works on **Monday 9th November 2026**

Phase 1: Footpath, Kerb and Gully Works

Until the Christmas holidays, works will focus on footpath and kerb preparation, along with the replacement of existing foundry gully pots.

These works will be undertaken using either **give-and-take traffic management or temporary traffic lights**, reducing the carriageway to a single lane. McQuillan's will confirm the traffic management arrangements once works commence, with give-and-take traffic management being used where safe working zones can be maintained.

Phase 2: Main Carriageway Resurfacing

The main carriageway resurfacing works are currently planned for **early January 2027**, with an estimated duration of **three weeks**.

These works will require a lane closure under temporary traffic lights to facilitate the safe completion of the resurfacing.

Operational Considerations

All personnel should be aware of the anticipated works and associated traffic management arrangements. Allow additional time for journeys through the affected area and exercise caution when travelling through the work zone.

Please note, Crane 97/95 movements maybe affected during the road resurfacing phase of the works.

This Operational notice will be self-cancelling upon completion of works.
